

BARBITARATE MAMMAL MINI-MAGAZINE

AN AMREP INDUSTRIES PUBLICATION
NUMBER SEVEN WINTER 91

**NEW 7"S, UPCOMING LP POOP
MASSIVE TOUR ACTION**

I trust you all had some HAPPY FUCKING HOLIDAYS. I thought I had a lot to say to start the year off right, you know, attacking a few folks in need of such. After typing it out a few times though, I realized I'd be pissing in the wind to spend much time on said folks, not to mention we all know it's to fucking cold in Minnehellplace to walk around all wet. So instead of a lengthy discourse, I'll just briefly point out a couple like..... College Radio stations that play 95% major label releases, requesting service....yeah right. Certain writers with their heads so completely buried up their ass', that smelling of the coffee is out of the question. Distributors that would bury their heads up there ass, but have never been able to locate said ass in the first place. Let's just stop there, as in '91, I'll attempt to be a kinder, gentler Hazelmyer.

So what's new? I'm giving AmRep's only slave/employee a hand with his label's second release. The label **A-Bomb** will be putting out a single by **Fetish 69**, they be Austria's heaviest outfit hands down. From the same country that brought you Arnold Schwarzenegger no less, limited pressing of 1000. Just plain mean stuff, to say the least.

SEVEN INCH DEPT: **Helios Creed** will be doing a seven incher out in Feb., the two unreleased tunes are "The Warming" and "Your Spaceman". He'll also be touring heavily, starting in Feb., check out the live psychosis. Helios told me these tunes are about spacemen coming to Earth, giving it the big thumbs down, Story line came from a dream. Believe it or not, that comes through loud and clear when listening to this, Helios.

Coming in Jan./Feb. the start of a single series from ex U-Men now tagged as **CROWS**. Set to run for 6 singles/6 months. Every bit as twistola snake assed as the U-Men plus some. Expect that to start in Feb/March. All are welcome to partake of throaty Mr. Bigley's world conquest.

Gear Jammer, hailing from Muskegon, Michigan, have a mailorder-only release on AmRep. This automobile inspired 7" is limited to a whopping 400, that you'll only get through our ever efficient mailorder dept. Way non rice burner sounding stuff, Seat belts a must. Don't be waiting for a promo either.

IN THE STUDIO DEPT: **COWS** working on their newest LP to be called "**Peacetika**". It'll be out in March. Wait 'till you see this cover, Living up to that midwestern value that an ounce of pretension, is worth a pound of manure, sure to be a hit with "artists" nationwide.

Vertigo, coming with an April release with their next. They're just putting the finishing touches on it, and any yobbo claiming their debut 7" to be the band's tops, better grab on to their fucking ass, they be going for a ride.

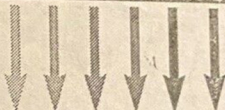

From the Vaults Dept: **Halo of flies** last recorded tracks before current hiatus, might be seeing the light of day (I said might). We're talking April, it's these big assed mod sounding tunes, what else did you expect from America's premier (...okay only) neo-neo Mod/Fascist band. Ask Mac or Anglim if this true and they'll confirm it! (yeah right).

Stuart Grey (**Lubricated Goat**) did get knived in the face in Berlin, did wind up in the hospital in Switzerland, with face and brain infection, left not paying his bill, and is now hanging in New York.

For you major label reps, I've had to set up a special phone line due to amount of incoming calls, it's 1-900-SEX TALK. Get ready to break out that visa card and let's rap.
